

President's Report

May 2018

Partnerships

- Regional Education Forum – Was a great success. We received a lot of positive comments from our superintendents.

Other

Garner Science Building

Air Condition units have been ordered, asbestos abatement has been completed, chemicals have been removed, slab construction is underway, and our staff is working on ADA modifications to the restrooms. The contract is near final between Engineer, Legal and Contractor but is not delaying any of the work. We expect the units to arrive in June

Pathways

Our next big push on the Pathways project is to develop the high school component of the degree pathways.

Emergency Training

On May 1-3 we had a Multi Hazard Emergency Training provided by FEMA targeted specifically for higher education. The training was very informative and we had a wide representation of building managers attend this training. We have received positive feedback from those attending.

Budget

We have been working on budgets and plan to have a budget for board review by the June Board meeting. Perhaps we can schedule a budget workshop beginning at 6pm the same night of Board meeting. We are open to any other board considerations regarding the scheduling of the workshop.

Past Meeting/Events

Conversations with Students – Del Rio Schedule - April 5th
